

Native Plant Habitat Restoration

Join San Diego Audubon and the Port of San Diego as we restore coastal sage scrub habitat in Coronado!

After months of removing non-native vegetation, we will be installing native plants to create healthier habitat for the birds and other wildlife that call the Silver Strand home. From butterflies and bumblebees to gnatcatchers and hummingbirds, wildlife thrives when habitat is restored. Come get your hands dirty and enjoy time in the sun with friends!

When: **Sunday, November 24th, 2019**
Saturday, January 11th, 2020
Saturday, March 14th, 2020
Sunday, June 14th, 2020
