HOMEOWNERS ASSOCIATION

**REQUEST FOR ADMINISTRATIVE ARCHITECTURAL APPROVAL
INCONSEQUENTIAL CHANGE
SOLAR INSTALLATION**

I would like to request an administrative architectural approval as provided under Section 9.14 of the Coronado Cays Homeowners Association Member Handbook. The property address of the proposed solar panel installation is:

Proposed location of solar panels (Please attach plans and installation specifications): _____

Homeowners are encouraged to install solar panels in a location on the home that **minimizes the visual impact of the panels**. Conduit and boxes must match the building color or must be painted to match the exterior color of the building.

ANTIGUA, KINGSTON, AND MONTEGO VILLAGES – Requires AECC Application.

MARDI GRAS CONDOMINIUMS ONLY: Homeowner must remove all roof attachments for roof maintenance and repairs at owner’s expense. All attachments on the exterior, such as conduit or similar, must be painted the same color as the home. Any attachment to the roof must be approved by the HOA so that the roof warranty remains valid. An Indemnity Agreement must be obtained from CCHOA for any maintenance and/or repairs are the responsibility of the owner to maintain.

ALL SOLAR PROJECTS – require a permit from City of Coronado and permit is to be provided to CCHOA prior to installation.

This is a complete description of the solar installation. I understand that if I have misled staff with regard to the size and location of the solar panels or if I have omitted any significant part of the work in the above description, I could be subject to a fine, liability and/or the removal of the solar system after it has been installed.
